Description of Works	Value
TIME AND MATERIALS	£450.00
Site Date: 23/11/2017 Fitter attended site, reprogrammed AVI Panel to main entrance shutter to give a three minute delay after activation as discussed with site contact. Fully fire tested twice and left in working order. Fitter assessed side entrance shutter in view of not opening fully to find limit out of sync with opening due to being closed on open doors and bagging in head then rotating in head box before refitting in guides. Part removed casing and reset both limits to correct positions. Reprogrammed AVI to three minutes and tested. Fitter advised customer to maintain clear openings.
