Description of Works	Value
TIME AND MATERIALS	£360.00
Site Date 6.12.19 Fitters attended site to investigate fault with L/H VFO gate. Fitters found error 09 displayed on control board indicating a BUS anomaly. Checked and cleaned all photocells and error disappeared however did notice that the cable to the photocells is not BUS cable which may be causing issues. Fitters also found that the +12v cable going to the loop detector was snapped off so re-terminated it. Also found that one of the cables in stop circuit going to the wireless transmitter had snapped off probably due to the excessive vibration through the post. Re-terminated this cable and adjusted the top rollers to eliminate the vibration and gate now runs ok.
