Description of Works	Value
REPAIRS	£200.00
Site Date: 09/01/2020 Fitters attended site to fit new photo beam and safety edge. The parts supplied are not compatible with the door, and has a electric remote edge and multiple through beams, the door itself was part of a automated system linked to a barrier and loops, the ramp is no longer used at the exit and because many faults to various parts the door has been converted to dead man push to run on main panel key switch. To restore to auto use a new control panel may be needed plus several days to identify all circuits and what parts need replacing. The door and surrounding area would also need fully cleaning of bird mess due to the health hazard. The external roller shutter and internal barrier do not work also, so they would also need investigation as they are all interlocked. Fitters also informed by site security that the ramp has been condemned and vehicles are not allowed on it but that is unconfirmed. Left door closed, as found.
