Unjammed curtain and removed from guides. Found the bottom bar had caught onto one of the top structural fixings for the headplate and was badly jammed, loosened motor bolts allowing motor and barrel assembly to slide forward and free curtain and bottom bar. Fastened motor and bearings, refixed guides back into place and readjusted limits. The original cause of this issue was probably due to the bad condition of the curtain, which may have caused the shutter roll to bag. Shutter left in good working order, but a whole new curtain is required.</p> <p>Job Total: £430.00</p> <p> {"\$binary":{"base64":""}}</p>	<p>£430.00</p>
