Description of Works	Value
A-14789 - SPEED DOORS (-speed door) w3w: prop.vanish.tests	
BREAKDOWN REPAIRS Site Date: 01/10/2025 Callout: £105.00 1st Hour/Travel: £260.00	
Work Details: The engineer attended the site and found the speed door open and in manual mode, with the manual eyelet stem appearing to be bent. Power was present, and safety devices were activating. The engineer was unfamiliar with the specific motor and control panel. It was observed that the casing was not properly secured, and the left-hand head set fixings were loose, causing the head plate to pull away from the wall. The door was isolated, and the client was advised not to use it. Photos were taken for reference. It is recommended that a two-man team, including an electrician, attend the site with relevant manufacturer documentation to further investigate and resolve the issue.	£365.00
Job Total: £365.00
